Urgent orders	96
Duplicate orders	0
Orders requiring approval	169
Highest purchase order	PO-2026-3076
Supplier	Kenitra Maintenance
Highest amount	202,896 MAD

AI Procurement Analysis

Risk assessment: The volume of high-value orders and risky-supplier orders indicates a high procurement risk and requires close monitoring before ERP processing.

Main anomalies: No duplicate purchase orders were found. However, 96 urgent orders may create supply-chain disruption risk, and the highest order requires additional financial control.

Recommended action: Review high-value and risky-supplier orders, validate urgent purchases, and confirm the highest-value order with the procurement manager.

Business action

Review sensitive purchase orders before supplier confirmation and ERP processing.
